Professional Summary

Software engineer and engineering leader with 10+ years of expertise in distributed systems and event-driven architectures. Track record of taking high-ambiguity bets from zero to production, with work spanning AI agents, event streaming, and partner ecosystems that has repeatedly shaped product direction. Champions technical excellence while driving cross-functional initiatives that move the business forward.

Skills & Technologies

Programming	Java, Python, Typescript, Bash, Go
AI/Intelligence	MCP, RAG, Amazon Bedrock, GCP Vertex AI, OpenCode, Claude, ChatGPT
Streaming & Data	Confluent, Kafka, Flink, Schema Registry, DataHub, Postgres, DynamoDB, MongoDB
Cloud	AWS, GCP, Azure, OpenStack, Cloudflare
DevOps	GitHub, GitHub Actions, Docker, SaltStack, Terraform, Vault, Nomad, Prometheus, Grafana, Ansible, SemaphoreCI
Web	HTML5, CSS, Typescript, JavaScript, Tailwindcss, Astro, WordPress, React

Professional Experience

**Confluent**
Manager, Partner Tech
Staff Partner Innovation Engineer

Toronto, ON
Jan 2026 - May 2026
Oct 2022 - Jan 2026

- Led a 3-engineer pod as a player-couch, transforming Confluent Hub into a monetizable partner ecosystem with multi-tenancy, policy-based access controls (PBAC), and Cloud-integrated billing infrastructure.
- Developed Confluent Arcade, a gamified developer learning initiative modeled after AWS GameDay & Google Skills, designed to bring hands-on Kafka and Confluent Cloud challenges to customers and the broader developer community
- Originated Confluent's OSS MCP server [mcp-confluent](#), exposing tools across Kafka, Flink, Schema Registry, Connectors, Tableflow, and Billing. Now officially supported as part of Confluent Intelligence and recognized by product leadership as a pillar of Confluent's AI/agents strategy. Go-to-market (GTM) motion generated upwards of \$4M in sourced pipeline.
- Built a Kafka proxy to interpret Kafka's wire protocol, bridging clients and brokers via pluggable modules to unlock advanced Confluent Cloud use cases including field-level encryption, hybrid auth, and payload encryption using Vault, GCP KMS, and OPA. Directly influenced Confluent's product direction, laying the foundation for the adoption of Confluent Gateway and CSFLE/CSPE as productized solutions.
- Delivered an end-to-end GenAI RAG [quickstart](#) integrating Confluent, Apache Flink, Amazon Bedrock, and MongoDB Atlas, showcased at AWS re:Invent as a GTM initiative.
- Developed a DynamoDB Source Connector for a client, later promoted to a fully managed source connector.

**Wavelo (Tucows)**
Senior Staff Engineer (Kafka)

Toronto, ON
Nov 2020 - Oct 2022

- Architected multi-datacenter Kafka infrastructure with Schema Registry, MirrorMaker2, and Connect.
- Developed automation for provisioning, maintaining, and monitoring Kafka environments using the HashiCorp stack.
- Built real-time observability dashboards for Kafka cluster health, security, and performance using DataDog, Prometheus, and Grafana
- Built self-serve GitOps tools to increase speed and productivity of developers using the kafka platform. (Topic Management, ACL Management, Kafka Connect Cluster Deployment, KSQL Deployment, Self-Hosted GitHub Runners, etc...)
- Optimized Kafka performance by identifying bottlenecks and implementing throughput enhancements.
- Ensured system reliability through rigorous disaster recovery testing and routine backup and restoration exercises.
- Mentored teams on Kafka and event-driven design, helping set the standard for how we built systems across the company.

**Bank Of Montreal (BMO)**
Senior Application Developer

Toronto, ON
Sept 2018 - Oct 2020

- Played a key role in advancing the bank's Customer Intelligence Platform by delivering a near real-time solution to provide the business with a unified view of customer interactions and enhance customer experience.
- Designed and implemented a secure, field-level encrypted real-time data pipeline enabling seamless data transfer between on-premises and cloud-based Kafka clusters (AWS).
- Developed and optimized real-time streaming data pipelines to facilitate reliable data exchange across systems and applications.

**Viacoremedia**
Web Developer

Toronto, ON
May 2016 - Sept 2018

- Designed and developed scalable, responsive, and robust web pages optimized for high performance & conversion rates.
- Managed web pages, email hosting, and web hosting services to ensure seamless client operations and user satisfaction.
- Delivered detailed software solutions encompassing animations, scripting, and CMS development.

Education

York University
B.Sc, Spec. Hons. Computer Science (Software Development)

Toronto, ON
Sept 2013 - April 2018
